

Fire fighting ranks amongst the world's most hazardous occupations, and at times Personal Protective Clothing is your last line of defence. That's why Fire Fighters deserve the right protective clothing. PPC has invested serious resources over more than a decade in protecting Fire Fighters. Advanced textile technology is blended with innovative garment design engineering and the highest quality craftsmanship to assure PPC truly advances your last line of defence. Our fireground proven Sentinel range provides high performance flame and heat protection, along with ultra mobility, comfort and venting of metabolic heat.

PPC quality is backed by independent certifications and comes in a range of ex stock or customisable design specifications to meet your particular fireground risks.
