SENTINEL AG STRUCTURAL FIRE FIGHTING ENSEMBLE - PRODUCT INFORMATION

Fire fighting ranks amongst the world's most hazardous occupations, and at times Personal Protective Clothing is your last line of defence. That's why Fire Fighters deserve the right protective clothing. PPC has invested serious resources over more than a decade in protecting Fire Fighters. Advanced textile technology is blended with innovative garment design engineering and the highest quality craftsmanship to assure PPC truly advances your last line of defence. Our fireground proven Sentinel range provides high performance flame and heat protection, along with ultra mobility, comfort and venting of metabolic heat.

PPC quality is backed by independent certifications and comes in a range of ex stock or customisable design specifications to meet your particular fireground risks.

DETAILS

- Outer Shell Fabric – Highest quality 260gsm meta aramid with a rip stop weave and fluorocarbon treatment for water and chemical run off.
- Thermal Liner – Highly insulative double layered construction of para and meta aramid blend fabric quilted to a meta aramid and FR viscose blended scrim. The para aramid increases break open resistance in flame exposure and the FR viscose promotes wearer comfort.
- Thermal liner is permanently fixed to the outer shell.
- Bellows action design to promote cooling and air circulation.
- Meta aramid high strength FR thread used throughout all garments.
- Highest quality FR retro reflective glass bead tape.
- High utility non spill cargo pockets with rear facing bellows and drainage vents avoid snagging and keep PPE dry.
- Double needle lap folded seam construction for superior strength.

A. TURNOUT COAT - 36516

- High stand collar with integrated neck and throat protection. All layers of textile protection are continued up into the collar. Collar designed to interact seamlessly with all helmet configurations.
- Maygar batwing shoulder and sleeve design for unrestricted reaching and bending in all postures.
- Multi purpose accessory hook and hip level non spill radio pocket.
- FR Velcro securing storm flap for protection over heavy duty zip closure.
- Meta aramid knit storm cuffs for double layer closure under gloves.

B. OVER TROUSER - 33524

- Adjustable and removable FR braces fitted with quick release safety snaps.
- Waist adjustor tabs provide up to 100mm reduction.
- FR Velcro openings at the base of legs for ease of use over boots.
- FR Velcro fly front for secure protection over groin area.
